Re: Braden's Cleaners - Discharge to alley, complaint.

On March 2, 1988 this office received a complaint about Braden Cleaners, Fremont Ave. and Sunshine St., discharging wash water to the alley behind their property. Karen Chandler and I checked behind their property and found water standing in the alley, but it had been raining. We again checked the alley on March 7, 1988 and found no water. We went into Braden's and talked to the owner and informed us that their washing machine discharged to the sanitary sewer. We inspected it, and found this to be true. He did inform us that he does have a little bit of boiler blowdown. He informed us that from time to time he does have to blowdown his boiler and it does discharge to the back of his building. He said that it was mostly steam. We will watch this in the future and if we see a problem we will require Braden's attach the boiler blowdown to the sanitary sewer.
